

Carbon Reduction Plan

Supplier name: Wellspect Ltd.....

Publication date: 22nd May 2023.....

Commitment to achieving Net Zero

Wellspect Ltd is committed to achieving Net Zero emissions by **2045**.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
<p>Wellspect Ltd is a subsidiary affiliated to Wellspect AB, with headquarters in Molndal, Sweden. The carbon footprint calculations are made on a global level, as these are the targets, which have been submitted to SBTi.</p> <p>Within scope 3 the subset that's included are categories:</p> <ul style="list-style-type: none"> 4. Upstream transportation and distribution (minimum boundary) 5. Waste generated in operations (minimum boundary) 6. Business travel (minimum boundary) 7. Employee commuting (minimum boundary) 9. Downstream transportation and distribution (minimum boundary) 	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	2853
Scope 2	1295
Scope 3	4688
(Included Sources) Including category 4,5,6,7,9	
Total Emissions	8836

Current Emissions Reporting

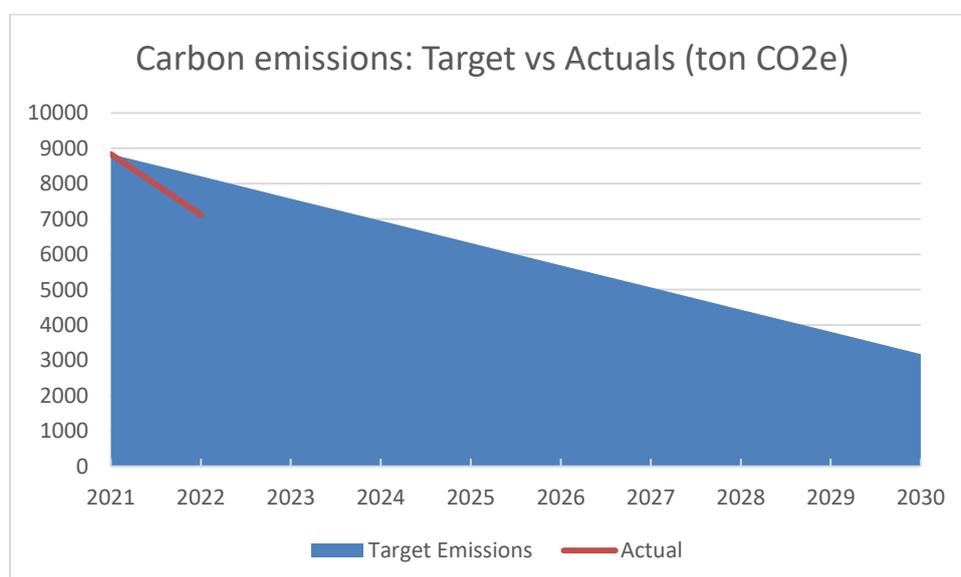

Reporting Year: 2022	
EMISSIONS	TOTAL (tCO2e)
Scope 1	2908
Scope 2	159
Scope 3 (Included Sources) Including category 4,5,6,7,9	4051
Total Emissions	7118

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets on a corporate level. Wellspect has committed to Science Based Targets initiative (SBTi) and validation of the targets is due in September 2023.

We project that carbon emissions will decrease to **3268 tCO2e by 2030**. This is a reduction of **59%** compared with the base line year 2021.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives:

- 100% renewable electricity at our office in the UK
- Energy saving programs in our UK office, leading to reduced consumption of natural gas.
- 100% renewable electricity at our manufacturing plants from the start 2022
- Full conversion to a new coating process in our Swedish manufacturing plant.
- Solar panels installed at our distribution centre in Germany leading to own generation of electricity.
- Sealing of our sterilization equipment leading to reduced emissions.
- The above-mentioned activities have been completed and is the reason for the reduction seen in 2022.

The carbon emission reduction achieved by these schemes equate to **1718 tCO₂e**, a **19%** reduction against the **2021** baseline and the measures is in effect as from **2022**.

In the future we hope to implement further measures such as:

- A new coating process at our manufacturing site in Turkey.
- Further energy savings.
- Replacing the cooling systems to those utilizing ammonia as cooling media, to eliminate the emissions of greenhouse gases from these systems.
- Electrification of the car fleet.
- Reduced air freight of products.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Svenn Poulsen, Group Vice President Wellspect HealthCare

Date: ...15.5.23.....
