

## Carbon Reduction Plan

Supplier name: Wellspect Ltd

Publication date: 10<sup>th</sup> December 2025

Commitment to achieving Net Zero: Wellspect Ltd as a fully owned subsidiary of Wellspect AB is committed to achieving Net Zero emissions by **2045**.

### Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
Wellspect Ltd is a subsidiary affiliated to Wellspect AB, with headquarters in Molndal, Sweden. The carbon footprint calculations are made on a global level, as these are the targets, which have been submitted to SBTi.	
Within scope 3 the subset that's included are categories: 4. Upstream transportation and distribution (minimum boundary) 5. Waste generated in operations (minimum boundary) 6. Business travel (minimum boundary) 7. Employee commuting (minimum boundary) 9. Downstream transportation and distribution (minimum boundary)	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	<b>2853</b>
Scope 2	<b>1295</b>
Scope 3 (Included Sources) Including category 4,5,6,7,9	<b>4288</b>
Total Emissions	<b>8436</b>

### Current Emissions Reporting

In 2024, waste emissions increased, this is due to increasing production volumes compared to 2023. The rest of the Scope 1, 2 and 3 categories did decrease compared to 2023.

The company vehicles emission data targeted users through a survey instead of calculating the scope 1 related emissions which resulted in better quality data.

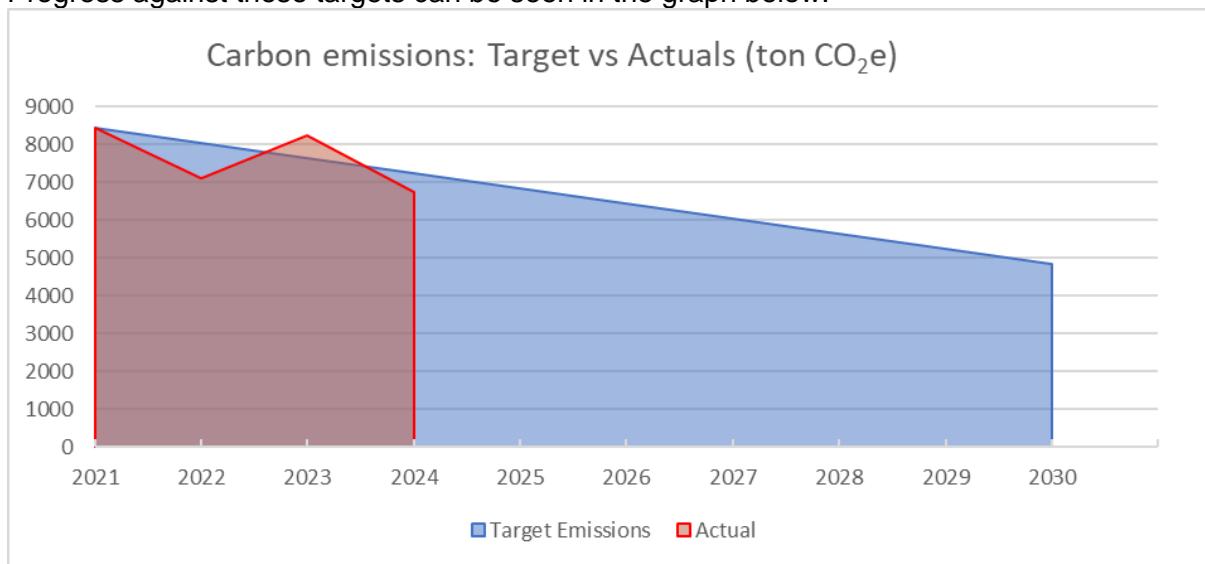

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	<b>2098</b>
Scope 2	<b>140</b>
Scope 3	
(Included Sources) Including category 4,5,6,7,9	<b>4494</b>
Total Emissions	<b>6732</b>

### Emissions reduction targets

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets on a corporate level. Wellspect have set targets set and have been validated by Science Based Targets initiative (SBTi) since March 2024.

We project that carbon emissions (within the scopes and categories listed here) will decrease to **4857 tCO<sub>2</sub>e** by **2030**. This is a reduction of **43%** compared with the base line year 2021. The targets were modified during 2023 as a result of the validation made by Science Based Targets initiative (SBTi).

Progress against these targets can be seen in the graph below:

### Carbon Reduction Projects

Completed Carbon Reduction Initiatives during 2024:

- Share of air transports was reduced with 7% compared to 2023
- Introducing a 5% biofuel policy for the heating system at our distribution centre in UK reduced the use of natural gas by 5%.

- Completed 2024 sealing project of our sterilization equipment leading to reduced emissions and shall continue year on year.
- The above-mentioned activities have been completed and is the reason for the reduction seen in 2024.

The carbon emission reduction achieved by these schemes equate to 1511 tCO<sub>2</sub>e, a 20% reduction against the 2021 baseline.

In the future we hope to implement further measures such as:

- Natural gas from fossil origin replaced by gas renewable sources.
- Implementing a new coating process at one of our manufacturing sites to aid reduction of our CO<sub>2</sub>e.
- Ensuring further energy saving programs.
- Electrification of the full car fleet.
- Reduced air freight of products.
- Transportation with lower emissions.
- Reduction of hazardous waste.

### **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

#### **Signed on behalf of the Supplier:**

**Richard Troman-Green, Commercial Director, Wellspect Ltd, UK**
